

Improve Time to Degree with

EduNav SmartPlan

Automatically Translate Degree Requirements into Optimized Academic Pathways — and Keep Them Up to Date No Matter What Changes

Many of your students, especially those from historically underserved populations, spend too much time and money on excess credits. They're taking too long to graduate — that is, if they graduate at all. Your institution cannot hire enough resources to scale the one-on-one advising these students need to determine their optimal path to graduation and stay on it.

With **EduNav SmartPlan**, you'll automatically create a course-to-career plan, including a current term schedule, for each student, telling them what they need to do now, next semester, and after to graduate on time and on budget. SmartPlan is the only solution that keeps academic plans up to date, no matter how many times course offerings, requirements, or students' needs change. It gives advisors more time by empowering students to answer questions like:

“

SmartPlan doesn't try to do what advisors do. It gives me more time to do what advisors are meant to do. ...**SmartPlan is giving me more time to make more of a difference.**

Erin Spurbeck, M.A.
Counselor

**NORCO
COLLEGE**

”

- What courses fit my work schedule?
- When will I graduate if I take/don't take this course?
- What courses will speed up graduation and minimize cost?
- What if I changed my major? Dropped this course? Took a semester off to work?
- What course section should I prioritize to stay on track?
